Sudden War Crisis

The defeat of the Greeks by the Turks a few days ago at Smyrna and the total destruction of that city and the massacre of thousands of Christians and Armenians seems to have caused the victorious Turks to consider attacking Constantinople. The Allies consider that this city and the Dardanelles should be neutral and are taking serious steps to oppose the Turks if they make any move to capture Constantinople.

The big danger is that Bedouin Russia and the Mahomedans are celebrating this victory and Russia is mobilizing troops to assist the Turks to capture the Straits and Constantinople.

Great Britain is sending the Atlantic fleet to the Dardanelles and they feel that the combined fleet operating with big land forces which have been sent will be sufficient to check attack on the Straits.

Canada's Part

A special session of the Dominion Cabinet was called on Monday to consider the situation in the Near East. If England asks for help parliament will be called immediately to discuss the situation.

Publication of a official word that Britain had invited the overseas Dominions to help in the defence of the neutral zone caused a distinct recurrence of the war spirit throughout Canada and requests to be allowed to take part by individuals and semi-military organizations have flooded the military department at Ottawa.

WEDNESDAY MORNING

The danger of war between England and Turkey seems to be passing away. England, however, states that under no conditions will she allow Turkey to enter Europe and that she will draw on every resource to stop the Turks if they attempt this.

DO YOU KNOW THIS MAN

Information is wanted regarding the whereabouts of Henry or John Frederickson and any person knowing of his location in the Old or Didsbury district should notify the Pioneer office or Const. Janman of the Provincial Police at Olds at once.

Mr. Frederickson's brother, Sofus, is lying in the Viking hospital dying from pneumonia and typhoid fever and his brother is supposed to be in either of the two districts mentioned.

Mrs. H. Reiber is attending the Provincial W. C. T. U. Convention in Calgary this week.

Mr. W. Finlay was a visitor in Calgary last week and spoke on Foreign Missions in the Baptist and Nazarene churches. He has no less than fifteen appointments now to speak on this subject at different places. Mr. Finlay's experience as a foreign missionary, especially in Nigeria, S. A., is very interesting to listen to.

There is evidently some hay moving these days as there have been quite a few large loads brought in.

Rev. D. E. Hattie will have charge of the services at the Presbyterian church on Sunday evening next.

Big preparations are now underway for the big district School Fair to be held on Saturday the 30th of September.

Mrs. H. Hermansen, Mrs. J. H. Helm, Mrs. G. Lienster and

Convert Your Victory Bonds

The Minister of Finance offers to holders of Grand's Victory Bonds issued in 1917 and maturing December 1, 1922, the privilege of exchanging the maturing bonds for new bonds bearing 5% per cent. interest and maturing in 5 or 10 years. A bonus of a full month's interest will be given to those who avail themselves of the conversion privilege not later than September 30.

WE WILL ARRANGE TO PROVIDE
YOUR BONDS WITHOUT CHARGE

Union Bank of Canada

KING COAL

Prices of coal have gone up but we still have some at REASONABLE QUOTATIONS. See us and arrange for your winter's supply, or if not quite ready for the letter, a talk on the coal situation may be profitable.

RED ROSE TEA "is good tea"

Be A True Sportsman

The shooting season in Canada's Western Provinces is at hand and young and inexperienced sportsmen will visit with seasoned old hunters in taking toll of wild duck, prairie chicken, geese and bigger game. In many respects the West constitutes the sporting man's paradise. In other Provinces, to a very great extent, it is necessary for sportsmen to travel far afield from home to enjoy the hunting season, but in the Prairie West wild duck are to be found almost every pond, slough and lake, while prairie chicken feed about the stocks of grain and roost in the little wooded boulders which dot the farm homesteads.

These game birds are one of the assets of our Canadian West, and an asset worth protecting. Apart altogether from the sport of hunting, these birds have a high food value and are a delicacy much enjoyed by all. During the close seasons their presence adds to the picturesqueness of Western life and call forth expressions of interest and delight from permanent residents, visitors and tourists.

It is in the interests of all, therefore, but perhaps more particularly in the interests of the sportsmen themselves that certain laws should be enforced. It is all the more important in view of the opening of the shooting season. Laws have been enacted requiring the period of the "open season," limiting the size of the daily and seasonal bags, and imposing penalties for infraction of these ordinances. Violations of these laws are however, not always easy of detection, but it should be a part of every true sportsman's code that he observe these laws which have been enacted for his own and the public good, and that he should actively interest himself in seeing that such laws are obeyed by others, and offenders brought to book.

Old-timers can recall when the buffalo ranged over these prairies in countless thousands; so numerous in fact that any thought of the possibility of their extermination never entered the mind of anyone. Yet a comparatively few years of wanton, wholesale slaughter cut the buffalo disappeared and is only to be seen today in zoological gardens and in specially prepared Government reserves. In like manner the indomitable Little Beaver, Canada's national animal, was in danger of extermination until the killing of beaver at any and all times was prohibited.

A report recently issued by the British Columbia Government states that the famous Fraser River, the greatest river in the world for years in its yield of sockeye salmon, whose waters only a decade ago were so crowded in spawning season of the year that a person could literally walk across a school of fish, is now fished out so completely that it is impossible to catch even a single specimen, and that the Prince Rupert salmon fisheries, too, practically exhausted. The salmon industry was not so long ago one of British Columbia's greatest industries, and one which advertised the Province all over the world. The men who have been responsible for thus annihilating the salmon in a brief span get rich quick when their ruined and bankrupt business has forced itself into legal lassos on their friends and families.

There should be an abiding lesson in these things, the force of which should not be lost upon every man who takes on a license in the Western Provinces this year. Some men may think it unwise and an evidence of fear to take a license, but it is better to be safe than sorry. Let us all help to keep the law in force, and to help to enforce it, and to help to see that what has already been described is a veritable asset.

Showing on the maps sake of caution is not smart, and the man who indulges in such a practice is not a true sportsman. And most assuredly he is to be pitied who, in view of the present situation, would openly and willfully deviate from the legitimate means of sport, and to rob still country of what has already been described as a veritable asset.

Gaming guardians should be accorded every possible support by all true sportsmen and lovers of wild life, in insistently demanding stringent action to prevent the rapture and impetuosity of action, and also by their acts to impress the public with a desire to secure those tracks and bring them to justice.

The West can ill afford to have our game birds go the way of the buffalo, the deer and the moose, and strict observance of existing game laws, by sportsmen, and the enforcement of such laws by the Game Department, is the right and duty of all, and who by their acts jeopardize the future, will expose to the Western Provinces an ever continuing plague and guarantee a return in time of the picturesquie features of the country to wild bird life.

ASPIRIN

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all!

Genuine

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for physicians.

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbo Pain, and Pain

Bayer "Bayer" boxes of 12 tablets—Also bottles of 24, Druggists.

Manufactured to assist the pain, aching, inflammation, the Bayer Bayer Company can be consulted with these general trade marks, Inc., Bayer Corp.

New Plan to Exterminate Rodents

Use Poison Gas to Clear French Fields of Moles

The valley of Ajuda, on the Swiss-French frontier, has been invaded by thousands of moles, and the rodents are doing much damage. They are believed to have come from the trenches in Alsace. The village authorities have arranged drives by the people, offering half a cent for each dead animal. Poison gas is being used and the method is to inject this into the subterranean galleries built by the moles. It has proved most effective, 27,000 dead being the record for one day.

A CORDIAL IN TREATMENT OF DISEASE

This is an apt description of Consumption. It is an unnatural condition to begin with—but it's dangerous because it leads to indigestion, fits, the system with poison, brings on a feverish condition, and, finally, you don't want to weaken the system by a harsh gripe medicine, what you need is mild natural stimuli to bring it back. You get this in your coffee in Dr. H. H. Phillips' when rope up the liver, restore the bowels to perfect action and positively cure consumption. You'll find this new coffee very good with Dr. Hamilton's Pill, good for young and old—a real family medicine. 25¢ all dealers or the Catarrhous Co., Montreal.

British Scraps Six Ships

In accordance with the Washington naval agreement, the Admiralty has ordered six large capital ships scrapped. They are the battle cruisers Lion and Princess Royal, and the battleships Orion, Monarch, Conqueror and Duke, all among the most famous warships in the British navy.

A GENTLE LAXATIVE FOR THE CHILDREN

Mother—The surest way of keeping your little ones well and happy whether it is the newborn baby or the growing child is to give them tablets of Dr. H. H. Phillips' gentle laxative. The stomach stimulates the desired English sparrow will have difficulty in finding its good graces. This indulged bird, however, has a friend at court, and its virtues are recited in an official report of the biological survey of the department of agriculture. The report explains that studies of birds as insect destroyers and of various and parasite pests, extending through a century of observation, show that many so-called bird pests are active aids to the farmer as insect destroyers.

The survey proves that the sparrow is one of the most useful birds which can be used to advantage in localizing asparagus beetle, largest leaf-miner, caterpillar, canker worm and drop worms, and that the quail usually a sedentary, also feeds on the locusts the olive scale. W. L. McAfee, of the United States biological survey, gives cases where birds of hawks have destroyed insect plagues and their eggs and larvae are completely. That such species never have returned to the localities where they were causing much damage. Ordinarily, of course, the birds are not sufficiently numerous to cope with widespread insect invasions. —St. Thomas Times Journal.

Reported Huge Stones Will Enter Earth With French Interests

Industrial leaders in Berlin, who are credited with being well-informed, consider the plans of Hugo Stinnes Germany's leading industrialist, as likely to result in the peaceful conclusion of a pact between Herr Stinnes and a group of French interests, represented by the Marquis de Lhertere, which will have as its object the scientific working out of a plan for the restoration of the war-devastated areas.

These negotiations, which have been going on virtually over the heads of the German and French Governments, will make it possible for local co-operatives and larger units in the former French zone to contract direct with the Franco-German syndicate for building and other materials, which will be delivered chiefly by Germany.

Big Fox Ranch For Minnesota
Grantation of a \$15,000,000 acre tract, including water and marketing rights, has been completed in Minneapolis, Minn. The company plans on having several thousand acres of prime Edward Island foxes on its ranches in a few years.

The building of the St. Nazian Canal began in 1859 and required 10 years.

Ask for Minard's and take no other.

Meaning of Conservation

How to Make the Best Use of Our Natural Resources

Curious how many people entirely misunderstand the meaning of conservation. We overheard someone, not long ago, talking glibly of the need of conserving our forests, and it became evident that his idea was that someone should prevent the lumbermen from cutting down the trees. Conservation means use; intelligent use as distinguished from wasteful use. Canada has been endowed by nature with incalculable natural resources, but it is more folly to brag of those resources, to pat ourselves on the back as though their possession were some way a merit of our own, unless we are prepared to get to work and put them to the best possible use. Our waterpowers might as well be in Greenland unless we are determined to develop them to do something useful. Our timber resources are inexhaustible if we practice conservation in their use and that does not mean letting them alone, but cutting scientifically and adopting a policy of reforestation. Our enormous coal resources are capable of adding immensely to the national wealth, and making us independent of outside sources of supply, if we put our experts to the problem of how to make them economically accessible to the country as a whole.—Ottawa Journal.

The Druggists All Agree That "Putnam's" Is Best

The oldest and best known on the market is Putnam's Liver Extract and it is the best. Your doctor will drop out after a few treatments with this palatable remedy. Failure impossible. Reuse a substitute for "Putnam's" 25¢ everywhere.

Praise for the Sparrow

Much Maligned Bird Is Prominent Amongst Insect Destroyers

When the harbinger of spring, the robin, leaves the wrath of the farmer, or its incursions into the orchard or the strawberry patch, the despised English sparrow will have difficulty in finding its good graces. This indulged bird, however, has a friend at court, and its virtues are recited in an official report of the biological survey of the department of agriculture. The report explains that studies of birds as insect destroyers and of various and parasite pests, extending through a century of observation, show that many so-called bird pests are active aids to the farmer as insect destroyers.

The survey proves that the sparrow is one of the most useful birds which can be used to advantage in localizing asparagus beetle, largest leaf-miner, caterpillar, canker worm and drop worms, and that the quail usually a sedentary, also feeds on the locusts the olive scale. W. L. McAfee, of the United States biological survey,

gives cases where birds of hawks have destroyed insect plagues and their eggs and larvae are completely. That such species never have returned to the localities where they were causing much damage. Ordinarily, of course, the birds are not sufficiently numerous to cope with widespread insect invasions. —St. Thomas Times Journal.

Predicts Revolution In Greece As Result Of Turkish Army Successes

Rome.—A dispatch to the *Globe and Mail* from Smyrna says the gates of the city have been closed to exclude the bodies of refugees in flight before the Turkish Nationalists whom British sailors are leaving aboard a British ship and the families of Greek officials and officers are departing. French and Italian forces have been posted over many houses to indicate that they are under the protection of those countries.

The dispatch adds that reports from Athens predict revolution in Greece and the return of General Doudos Venizelos to power.

The dispatch also says that Mustapha Kemal Pasha is personally directing the advance of the Turks against the Greeks and has shown extraordinary gifts of strategy and military tactics.

Considerable feeling was caused here by the report that two Italian soldiers, returning from Constantinople, had been attacked by Greeks at Thermes, one being killed and the other wounded. Following the attack, the Greek patrols visited the Italian legation and expressed regret. It is assumed the minister and the men who attacked the Italians would be punished and the families of the victims compensated.

London.—The Times learns that King Constantine has left Athens. No suggestion is made as to where he has gone, or why.

Constantinople.—While the Turks are hastening to press their advantage over the Greeks in their advance towide Smyrna, the latter are rushing reinforcements to the scene and General Venizelos can restore the morale of his men, the Realists may yet be brought to a standstill, it is believed.

Farmers May Shoot Ducks Out of Season

Saskatchewan Government Issues Order for Protection of Ducks

Regina, Sask.—An order-in-council has been issued by the Provincial Government making it legal for farmers to shoot, out of season, wild ducks which are damaging grain fields.

Many reports have been received from districts where the birds are causing much damage in the grain fields. In the first, Regal, Sask., they are said to be so plentiful that the efforts of two boys employed for the sole purpose of driving them off proved unavailing.

British Coal for Boston

Boston.—British coal is pouring into Boston in such quantities that 14 laden vessels are riding in the lower harbor awaiting opportunity to discharge their cargoes, while two others are in the upper harbor. Their loads total 96,000 tons. Nearly one-quarter of a million tons have arrived in this port since the first shipment followed the American miners' strike. Thirty-six steamers are en route from British ports for Boston, carrying upwards of 200,000 tons.

Gold Mining Accident

Frederick, B.C.—Tom Buddis is dead and George McAndrews slightly injured following a cave-in at No. 100 The Coal Mine of Coal Creek. Buddis, an untrained Russian workman, hit his head when the rock came down. He was buried with him for a few minutes, but died later, according to McAndrews, who was buried by the cave-in, but his injuries are negligible.

Amundsen's Air Fleet Returns

Vancouver, B.C.—Lieut. F. G. Fullerton, Edmonton, formerly of the Canadian air staff here, who was to have piloted Captain Amundsen's monoplane from Alaska to Spitsbergen, has arrived back from Alaska. Captain Amundsen will make the flight with one pilot only.

Wood Alcohol Poisoning

New York.—The deaths of three men and two women and a case of blindness have occurred in the Red Head section of Brooklyn, which police attribute to wood alcohol poison ing.

NEED AGGRESSIVE IMMIGRATION POLICY

CAPITAL FOR DEVELOPMENT OF WEST IS FORTHCOMING

Outward-looking immigration and development of our frontier areas are essential to the progress of Canada and to the solution of many national problems," declared Hon. Charles Stewart, Minister of the Interior, in discussing his recent western tour. "That a national and aggressive immigration policy has been developed and will shortly be announced, is now definitely known."

"Capital is required for development, especially in Western Canada, where the great natural resources furnish a great field for intelligent investment," Mr. Stewart added. "The Government is prepared to encourage investment for development, but not for exploitation or stock monopony. Every year Canada sends out of the country \$60,000,000 for petroleum and petroleum products. Alberta may, in the near future, furnish a huge market that may check in some degree this drain on our capital. The steady development of the United States of field north and through producing wells to the international boundary, is confidently anticipated that elsewhere will be made this side of the line that will bring activity and prosperity to our western territories. The same is true of other natural resources in the west."

"The Government is prepared to protect and encourage legitimate efforts in development and to discourage stock jobbing brokers. Lease conditions will be carried out to the letter by the Government and investors need not fear retroactive legislation imposing unexpected conditions or exactions. Successful development will repay the Government under present conditions and in the prosperity that follows in its wake."

Mr. Stewart stated that there was a feverish activity in the Southern Alberta country by powerful and legitimate companies in development, causing a great increase by the success immediately across the line. These companies, he said, are engaged in the production of wood and oil. The Canadian side drilling is already in full blast. In Forting, in charge of this branch of the Mine Department, is on the ground watching developments.

Agree to Offer Loan to Austria

Moratorium of Five Years Asked by London Bankers

London.—A group of London bankers have agreed to offer Austria a loan of between \$200,000,000 and \$300,000,000 krona according to the Daily Express.

The loan, which would require the approval of the Reparations Commission, would be secured by Austria's port revenues and would be granted

only on condition that Austria be given a moratorium of five years on her war indemnity payments.

Explorers Return

Vancouver, B.C.—Tom Buddis is dead and George McAndrews slightly injured following a cave-in at No. 100 The Coal Mine of Coal Creek. Buddis, an untrained Russian workman, hit his head when the rock came down. He was buried with him for a few minutes, but died later, according to McAndrews, who was buried by the cave-in, but his injuries are negligible.

Amundsen's Air Fleet Returns

Vancouver, B.C.—Lieut. F. G. Fullerton, Edmonton, formerly of the Canadian air staff here, who was to have piloted Captain Amundsen's monoplane from Alaska to Spitsbergen, has arrived back from Alaska. Captain Amundsen will make the flight with one pilot only.

Wood Alcohol Poisoning

Sentenced to Death For Counter-Revolts

Russian Newspaper Announces Conviction of Fifty-Five Persons

Moscow.—Fifty-five persons have been sentenced to death in South Russia upon conviction of counter-revolutionary activities. The newspaper Pravda announces: "The Ukrainian Court at Kiev sentenced 55 members of Politburo Comissark bands which, in connection with General Tukhatchevsky, forced, arose against the Ukrainian Soviet. All the convicted persons appealed."

At Smolensk, Nicolai Peleshko, a certain other who, under an assumed name, proclaimed himself the Czar of Russia several months ago, was sentenced to death, together with six followers, while Nine, Bozennikov and seven others were sentenced to prison.

German Payroll Shows Increase

Civil Service Employees Get Thirty Per Cent. Raise

Berlin.—Germany's civil service payroll for September will show an increase of one hundred billion marks over August in consequence of negotiations between officials and employees held at the Ministry of Finance. A 30 per cent. raise in wages was decided upon, due to the heavy cost of living.

The index figure on the cost of living throughout Germany rose 40 per cent. in August as compared with 32 per cent. in July.

Soliciting Funds For Irish Republican Cause

Widow of Mayer McSwiney in States to Raise Money

New York.—Mrs. Muriel McSwiney, widow of former Mayor Terence McSwiney of Cork, who died of starvation in British Prison, London, in 1920, arrived on the President Arthur. She was accompanied by Linda Mary Kearns, Irish Republican, and said the purpose of her visit was to raise funds for the dependent and dependents of the Irish republican cause and for hospitals of the wounded Irish republican army.

IT COULD BE WORSE.

Railway Employees May Fight Award In Recent Wage Dispute

RUSSIA CONFIDENT OF PEACE IN FAR EAST

OUTCOME OF CONFERENCE WITH JAPAN IS CONSIDERED HOPEFUL

Moscow.—Russian Soviet officials appear extremely confident in the outcome of the Japanese conference at Changchun will bring peace to the Far East and re-extension of Russia's sphere of influence to Vladivostok.

The railway administration is understood to be preparing to resume service on the European Asia route with direct through trains from Moscow to Vladivostok while the newspapers announced the formation of a limited company to operate airplanes from Petrograd to the eastern city.

Already Russian trains de luxe are operating again as far as China and Moscow now for the first time since 1918, foretells the Russian or the Russian flag waving again on the Pacific.

Taranto.—James Simpson, a member of the Board of Consultation, whose other two members, Alex Smith, Chairman, and Isaac Pitblado, K.C., representing the railroads, recommended tentative wage reductions to stop workers of seven and nine cents an hour, believes the 36,000 affected employees will fight the majority award.

Mr. Simpson submitted a minority award, which pointed out that the board did not properly inquire into the wage reduction. "On the round that the principal issue was not dealt with by the board, I feel I can express the opinion that the affected workers will fight the ruling," said Mr. Simpson, although he was not prepared to say the "feeling" of the men would lead to a strike.

Expect Italian Immigrants

Huge Colonization Scheme Is Now Under Way

Montreal—A colonization scheme to settle Italian emigrants in Canada is projected by the Government of Italy, which has sent General De Michelis, General Commissioner of Emigration, to make a minute survey of industrial and agricultural conditions in the Dominion with a view to ascertaining the quota and the type of immigrant needed here.

Mr. De Michelis passed through Montreal en route to Ottawa, where he will meet members of the Cabinet and confer with the heads of all departments of labor and immigration.

Following these meetings he will cover each of the provinces from Ontario westward, accompanied by Jules Bolognesi, Italian Consul to Canada. When Mr. De Michelis completes this survey in Canada he will make a similar one of the United States.

In explaining his mission, Mr. De Michelis declared it had three chief reasons: First, to ascertain what class of immigration most needed is to the Dominion which Italy could supply; second, to secure Canadian capital, which would be loaned to Italian capital with the view of establishing Italian farmers on Canadian land; and thirdly, to collect firsthand data on actual conditions in the Dominion and to determine whether it is in the best interest of the Italian Government to embark upon the contemplated colonization scheme.

France May Utilize German Materials

Plan to Be Considered by Special Government Committee

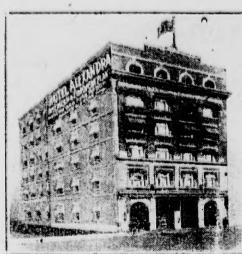

Paris.—An agreement for the restoration of France's war-devastated regions utilizing chiefly German materials came up for consideration before the Special Governmental Committee charged with consideration of deliveries of merchandise by Germany.

The plan has been under negotiation at a series of conferences between Hugo Stinnes, German Industrial magnate, and Senator De Lersac, President of the Federation of Cooperative Societies of the French Liberated Regions representing 130,000 persons, with war losses agreeing more than 13,000,000,000 francs.

Explorers Return to Halifax

Halifax.—A dispute from Sydney states that the exploration schooner Bowdoin, carrying Donald B. Macmillan and party, arrived in the latter Sept. 1 from Baffin Bay.

The expedition set out from Boston a year ago and has been in the Arctic regions since that time.

INVEST IN A PRACTICAL
COURSE AT THE OLDS
SCHOOL OF AGRICULTURE

Statistics show that farmers who have had an education make larger incomes than those who have received but little instruction in the art of scientific farming.

In light crop years and in strenuous financial times such as the country is now experiencing, a thorough training in one's profession is absolutely essential if success is to be attained. Under our present improved methods of farming men work large areas of land with a minimum amount of labor. They plow and cultivate their soil with appropriate implements at a specific time. They select varieties of grain and crops that are known to give larger returns than the ordinary varieties and kinds. They treat their seed to control diseases, and plant at rates per acre which experiments have shown to give maximum yields. They follow a system of crop rotation which aims at the conservation of soil fibre and the production of maximum yields of a variety of grain and feed. They select improved types of breeding animals and feed their stock in accordance with knowledge derived from the chemistry of foods, and their homes

are equipped with modern labor saving conveniences.

To keep up with the times and to make the most money from the farm one should know how to farm in accordance with these improved methods. You can learn these methods at the Olds School of Agriculture. Education pays; you can learn in a few months what it would take years of experience to give you. Talk with any ex-student regarding the value of the course at the O.S.A.

Clauses in Agriculture and Domestic Science commence October 31st.

This Week's Offerings HAYS & CO., LIMITED

We have a splendid young bull, son of Colonay Morat McKinley. This bull was born on January 1st, 1921.

Also some splendid sons of Edenvale Captain Ormsby. These later young bulls are sons of Sir Peter G. Ormsby Mercedes the 41st, the bull that has more sisters producing over 1000 pounds of butter fat per year than any other bull living or dead. In this connection we might say that this splendid bull is the sire of both our senior herd bulls.

HAYS & CO. LTD., CARSTAIRS, ALBERTA

BYNG'S SIXTIETH BIRTHDAY

On Monday when the Edmonton Canadian Club celebrated Lord Byng, Governor-General of Canada, a luncheon in the Macdonald, the chairman announced that it was His Excellency's 60th birthday. The hero of Vimy was tendered a real western ovation. On this occasion the introductory remarks of chairman John Ross, Deputy Minister of Education, the address of Baron Byng, and the reply of Premier Greenfield, were all commendable samples of patriotic, terse, and business like expression, really model luncheon addresses.

The preliminary estimate of the total wheat yield of Canada is 388,733,000 bushels, including fall and spring wheat, from 22,630,900 acres, or 17.25 bushels per acre, as against the 1921 final estimate of 300,858,167 bushels from 33,261,224 acres, or 13 bushels per acre.

DAIRY FARM FOR SALE OR RENT

I am offering my "Gowenlee Farm" four and one half miles south of Brandon, Manitoba, for sale or easy terms to the right party. This farm is on the Sunshine Highway, a high grade, dry ground road, 1½ miles main road into Brandon. The farm consists of 610 acres, all under cultivation and is in the centre of the oldest and best districts in Manitoba. The fence and fields are fenced with woven wire fencing, has plenty of good pasture and the fields are arranged so that they can all be utilized for grazing during the different parts of the year and are watered at the Little Souris Creek which runs through the farm. The farm is all under cultivation and 250 acres are now planted in winter rye, 60 acres in alfalfa and 60 acres to sweet clover. The cattle barn was built for dairy cattle and is fitted with Louden fixtures and stanchions and holds 10 cows. There is a water system throughout supplied in front of every stall. Connected to this barn are two silos 16x23 and these are now being filled with corn and sunflowers. The buildings are especially adapted for raising, are in good repair and suitable for horses. There is a separate horse stable, ice house, milk house, two granaries, implement shed, root house and a grain elevator, with barns built last year. The farm is well stocked with all feed which, besides ensilage, includes 200 tons alfalfa and other hay; also a quantity of coarse grain and feed corn. I will give payment at any time. I will sell to other farms for sale on easy terms to responsible parties who have help of their own.

If you are interested, write James D. McGregor, Brandon, Manitoba.

To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:

- (a) Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- (b) Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,
Minister of Finance.

WEDNESDAY, SEP. 20th, 1922.

Man comes into the world without his consent, and leaves it against his will. During his stay on earth his time is spent in one continuous round of contraries and misunderstandings. In his infancy he's an angel; in his boyhood he's a devil; in manhood he's everything from a lizard up; in his dotage he's a fool; if he raises a family he's a chump; if he raises a check he's a thief; and the law raises

Cain with him; if he's a poor ton he's a bad manager and has no sense; if he's rich he's dishonest, but considered smart; if he's a politician he's a grafta and a crook; if he's out of politics you can't place him and he's an undesirable citizen; if he goes to church he's hypocrite; if he stays away he's a sinner; if he donates for foreign missions he does it for show; if he doesn't, he's stingy and a tight-wad. When he first comes into the world everybody wants to kiss him; before he goes out they all want to kick him. If he dies young then there was a great future before him; if he lives to a ripe old age, then, of course, he's only living to save funeral expenses—Life is a fun-ny thing, isn't it?

SAYS FARMERS CUT HIDES ALL TO PIECES

There is severe criticism of the way the farmers take their hides off when butchering at home in a recent issue of the B. C. United Farmer, in an interview which they had with a member of the Christie Boot Factory firm, who was commenting on the wide spread between the value placed on pelts and those from the farm.

The wide difference, he said, was caused by the fact that the packer placed a premium on the care with which the hides were removed and cared for. The work of the butchers in those establishments were watched very closely, and the men were penalized for every cut made in a hide by them. The average farmer, on the other hand, did not seem to care how he got the hide off, and it was frequently so full of holes as to be practically useless.

"But isn't it a matter of experience and not carelessness?" he was asked.

"No" was the emphatic reply. "It is pure carelessness. Any one can take a hide off without cutting it if he is willing to take the trouble and provide him self with a knife reasonably well suited for the work."

In discussing the question further, Mr. Christie referred to an experience he had had shortly after starting business in Vancouver. He bought a large quantity of farmers' hides from a local dealer at a low figure but, even at that, had found the lot so full of holes that they did not pay for the labor and leather used in their tanning. He admitted that there were other factors that counted in favor of the packer. Most animals killed in the packing houses were well fed, properly finished animals, and it was well known that a hide from such an animal was very much better than one from an old or poorly nourished beast.—Market Examiner.

MISCELLANEOUS

FROST FREE PERIODS IN ALBERTA

At this season of the year when the first frosts are putting the autumn tints on the trees, it might be interesting to know something about the frost free periods in Alberta. The following figures are taken from statistics prepared by the Publicity and Statistical Branch of the Department of Agriculture, compiled from the meteorological Records covering a number of years.

Commencing at Medicine Hat in the south, we find that over a period, the average has been 81 days frost free, with 119 days in 1914 as the longest period, and 98 days in 1917 as the shortest.

At Calgary, over a 38 year period, the average has been 81 days frost free, with 118 days in 1903 as the longest period and 72 days in 1918 as the shortest.

At Banff over 16 years, the average has been 83 days with 116 days in 1919 as the longest period, and 33 days in 1917 as the shortest.

At Prince River over 17 years, the average has been 77 days, with 120 days in 1919 as the longest period and 44 days in 1914 as the shortest.

COMPLIMENTS ALBERTA STOCKMEN

Here is a nice testimonial to the cattle breeders of Alberta, from an American Stock magazine:—"The Aberdeen-Angus Journal," published at Webster City, Iowa. This paper pays of the Edmonton Spring Show held on April 10 to 13th. "The show all through is reported as one of the best ever held in the Dominion. The man who goes to the expense of attending a stock show deems it to get the greatest possible value for his money. The Edmonton show provided all these educational features. One is safe in saying that Edmonton put on the greatest show of fat cattle this spring that has ever been held anywhere in Canada. The quality of the bulls offered at the Edmonton Bull sale improved each year. The time was when there was a decided gap between the class of bulls sold at Calgary and those put through the sale ring at Edmonton. This breach is gradually closing, and there are now few fat and bold bulls offered at the north west event."

IN MEMORY OF WILLIAM HUNSPARGER

He has passed o'er the silent river,
With the sinking sun's last ray
Thus the pearly gates of heaven
The beginning of a new day.
The place which knew him so long here
Shall know him on earth no more.

He has left a vacant spot at home.

To wait on another shore,

Until God calls his loved ones.

When cares of earth are past,

To join that grand reunion

In Father's Home at last.

The theme of a noble life remains

To speak of the one who has gone.

Where doubt and fear, pain and care,

Can never, never come.

In God's own time we'll meet him.

When our work on earth is done,

Share the joys beyond the river.

Peace and rest, Oh welcome home.

Composed by Mrs. Ethel Goudie, Didsbury.

A three million-foot flow of gas has been struck at Barnwell, near Taber, by the Calgary Gas Company. A flow of gas was also struck during the past week at Vauxhall on the farm of Old Staples Company near Medicine Hat.

We are glad to be able to report that Mr. W. G. Liesemer who has been confined to the hospital here for some time is now home and improving fine.

The Rugby Women's Institute will give an entertainment in the Rugby school house on November 3rd. Further particulars will be announced later.

Mrs. B. A. St. Clair, Mrs. Gilchrist and Mrs. F. Alden all left on Tuesday evening's train for a winter's visit to Red Oak-town and other U. S. points.

Dr. J. L. Clarke M. D., and Dr. H. C. Lissener, dentist, have now opened up new offices in the Leuseler block where they will be pleased to meet their patients. Telephone No. 63.

Mrs. John Finlay, Matron of the Girls' Home in Edmonton was a visitor for a short time with Mr. W. C. Adams on Monday but left again on Tuesday to attend the W. C. T. U. Convention at Calgary.

A dance will be held in the Opera House on Friday, September 20th. Calgary music will be in attendance. It is announced. Tickets \$1.25 per couple, supper included. Come on out and enjoy a good dance.

The Ladies Aid of the Presbyterian Church will hold a fowl sale in the Opera House commanding at 2 o'clock on Saturday afternoon, September 20th. Lunch will be served all afternoon.

John F. Miller, the eye sight specialist of Calgary, 401 Underwood Bld., will be at the Rosedale Hotel, Didsbury on Friday, September 20th, for the purpose of examining and correcting all defective eyes.

Miss Marie Mueller of Los Angeles, is visiting at her home here. She intends to visit her brother in Three Hills and sister in Lethbridge before returning to the States.

Mrs. Alex. Campbell, accompanied by Mrs. Campbell, of Campbell and Anderson, was a visitor at Taber for a few days last week returning on Tuesday. Mr. Campbell states that Taber is booming, the crops are in pretty good shape and the opening of the coal mines has given business a great boost.

A meeting of the congregation of Knox Presbyterian church will be held on Sunday evening after the regular services to decide on a call to fill the pastorate. Everybody interested is requested to attend this service and meeting.

Sudden Illness of Mrs. H. W. Chambers

The many friends of Mayor and Mrs. Chambers will be sorry to learn that Mrs. Chambers was taken seriously ill with heart trouble last week and had to be taken to the Didsbury General Hospital. Nurse Marie Chambers was called home from Calgary because of the serious condition of her mother. Latest reports state that she is very slowly improving but that it will be some weeks before she will be able to get around again. Mrs. Chambers will be greatly missed in several organizations in town while she is ill, especially the Didsbury Women's Institute of which organization she was a very active member and

lender. Best wishes for her speedy recovery will be echoed by the whole community.

Knox Presbyterian Sunday School are holding a special Bazaar Day service in the church at 2 p. m. on Sunday the 17th of September. "Thy Kingdom Come." A cordial invitation is extended to all and especially to those boys and girls who have not been attending of late.

Geo. Alden had the misfortune to be thrown from a horse on Wednesday evening last and

received a fracture of the collar-bone. He was driving some cows home and the horse stepped into a badger hole throwing Mr. Alden to the ground and injuring him as stated.
